

BULLETIN

Designated Plant Inspectors

The [Workplace Health and Safety Regulation](#) 100 (1) places an obligation on owners of designated plant to ensure that their plant is inspected by an inspector of designated plant.

An owner of designated plant shall ensure that it is inspected by an inspector of designated plant at intervals as specified by a standard specified in the Workplace Health and Safety Regulations, the manufacturer of the designated plant, or the Authority.

Schedules 10 – 13 of the Workplace Health and Safety Regulations lists specific standards.

An ‘inspector of designated plant’ means the Authority, or a person or an organisation registered under Regulation 33 by the Authority (NT WorkSafe).

NT WorkSafe has contacted all current registered inspectors of designated plant in the Northern Territory to gain approval for their services to be included in this publication. This bulletin is updated regularly to include any changes to registered inspectors of designated plant.

Schedule 1 – Part 2 of the Workplace Health and Safety Regulations lists items of plant which are to be registered and inspected by an inspector of designated plant. They include the following:

- BO** Boilers categorised as hazard level A, B or C according to the criteria identified in AS 3920.1
- PV** Pressure vessels categorised as hazard level A, B or C according to the criteria identified in AS 3920.1, other than gas cylinders covered by AS 2030
- LP** LP gas fuel vessels for automotive use covered by AS 3509 and serially produced vessels covered by AS 2971
- TC** Tower cranes
- MC** Mobile cranes with a safe working load greater than 10 tonnes
- VH** Vehicle hoists
- BM** Building maintenance units
- PB** Truck-mounted concrete placing units with booms
- L** All lifts, escalators and moving walks
- AS** Amusement structures covered by AS 3533, with the exception of class 1 structures
- PH** Personnel and material hoist

As at 16 August 2011, the following persons are registered to inspect:
