CH 0023

# Chainsaw safety checklist >

| Item   | Yes | No | N/A | Issue / Action taken | Person responsible | Start and Completion Dates |
|--|-----|----|-----|----------------------|--------------------|----------------------------|
| 1. Are operators instructed in correct use of chainsaws? |     |    |     |                      |                    |                            |
| 2. Have operators completed chainsaw training?           |     |    |     |                      |                    |                            |
| 3. Is the operation manual available for workers?        |     |    |     |                      |                    |                            |
| 4. Are guards and safety features in good condition?     |     |    |     |                      |                    |                            |
| • Chain-brake  |     |    |     |                      |                    |                            |
| • Interlocked throttle                                   |     |    |     |                      |                    |                            |
| • Chain catcher  |     |    |     |                      |                    |                            |
| • Rear hand protector                                    |     |    |     |                      |                    |                            |
| 5. Is all personal protective equipment used?            |     |    |     |                      |                    |                            |
| • Hard hat   |     |    |     |                      |                    |                            |
| • Eye protection   |     |    |     |                      |                    |                            |
| • Hearing protection                                     |     |    |     |                      |                    |                            |
